

Twitter tools

2008-07-29 21:13:23

Twitter is a fantastic microblog system. In fact, it can be much more. For example I also use it for reminders and newsfeed. Some of my "twitter bots" are publicly available. Those are listed on this page.

Staaterfile

Staaterfile.nl is an experimental dutch traffic site. Following [staaterfile](#) on twitter will update you if there is any traffic information for the Netherlands. Sometime it will be possible to receive specific information by tweeting @staaterfile or sending a direct message.

Filmsoptv

Follow [filmsoptv](#) and receive a daily tweet (around 12.00) of the movies on dutch television for that day. @filmsoptv now also notifies at the start of a movie.

Film1

Receive tweets when movies start at the dutch Film1, Film1.2 and Film1.3 channels. Follow [@film1](#).
